Election/Restrictions

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-12 and 22, drawn to the remote data accessing, classified in class 709, subclass 217.
- II. Claims 13-21, drawn to receiving a Lightweight Directory Access Protocol request from a client computer to a front-end portion; processing the Lightweight Directory Access Protocol request to create a front-end call; sending the front-end call to a back-end portion; processing the front-end call using a default database function to produce a result, wherein the default database function comprises a mapping tree portion to identify a location of information stored in the back-end portion in response to the Lightweight Directory Access Protocol request sent by the client computer , classified in class 707, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as lacking receiving a Lightweight Directory Access Protocol request from a client computer to a front-end portion; processing the Lightweight Directory Access Protocol request to create a front-end call; sending the front-end call to a back-end portion; processing the front-end call using a default database function to produce a result, wherein the default database function comprises a mapping tree portion to identify a location of information stored in the back-end portion in response to the Lightweight Directory Access Protocol request sent by the client computer. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
